EXPERIENCE

[Rentoor](#) — Frontend Engineer (Reactjs, Nextjs)

Jul 2023- Present, Remote

Rentoor is Saudi Arabia's equivalent of Airbnb, streamlining short-term rentals by connecting verified property owners with tenants in a secure and user-friendly platform.

- Developed and maintained front-end applications using the Next.js framework.
- Optimized application performance through code splitting, lazy loading, and server-side rendering techniques.
- Collaborated closely with UI/UX designers to implement responsive and visually appealing user interfaces.

[Neavant](#) — Mid-Level Software Engineer

Nov 2022 - Jan 2025, Remote

Neavant is a Finnish software company where I was placed as a full stack software developer and specialized in frontend - React.js

- Built reusable components using modern front-end libraries for future use.
- Write clean code, suggested technical design and took responsibility for technical delivery.
- Collaborated With the app development team, including the project manager, back-end developers, designers and chief technology officer, to identify problems, test methods, and best practices.
- Ensured code quality and maintainability by following best practices, conducting code reviews, and participating in pair programming sessions.
- Developed custom hooks and utilities to encapsulate repetitive logic related to form handling and data fetching, enhancing code reusability.

LANGUAGES

English, Arabic

[Gaza Sky Geeks](#) — - Code Academy

Jul 2022 - Sep 2022

Was a mentor for Gaza Sky Geeks' Banat Geeks program, a camp for students who graduated from secondary school. The main objective of the camp is to guide students and make them able to choose their university major and determine their path.

- Introduce them to programming languages in general.
- Introduce them to the most used web languages (HTML, CSS, JavaScript).
- Use different training techniques to make the lessons more efficient and enjoyable.
- Collaborate with the camp team and review the daily feedback to adjust and improve the lessons.
- Help the students to understand the MVP building development cycle best practices.

[Google for Startups](#) —Full Stack Software Engineer Intern

June 2022 - Sep 2022, Remote

A competitive program where I was placed as an intern with a Google-supported startup and mentored by a Google engineer.

- Built reusable components using modern Front-end Libraries for future use.
- Converted PHP Blade Code to React JS Code.
- Optimized components for maximum performance across a vast array of web-capable devices and browsers.
- Wrote clean code, suggested technical design and took.
- Collaborated with the app development team, including the project manager, back-end developers, designers and chief technology officer, to identify problems, test methods, and best practices.
- Increased performance of the existing application by 40%.
- Increase website loading speed by 60%.
- Improving the user experience UX.
